## Silicon Valley Data Center

## Frequently Asked Questions

- + What is TopBlocks?
- + What service does TopBlocks provide?
- Why choose TopBlocks's mining machine?  
 TopBlocks' mining machine is highly reliable, secure, and cost-efficient. Its data center is located in the tech mecca of Silicon Valley, United States, and features cutting-edge 5A-level IDC servers, a 99.99% SLA service agreement, and dual-circuit uninterruptible power system. All these features significantly enhance the stability of the data center. Exceptionally, users of TopBlocks' mining machines can expect a 30-day lucky value exceeding 110%, far exceeding the luck value of other manufacturers at 98%. This translates into an extra 10% income for users.
